

Meet Katie, Zoe & Billy

Katie, Zoe & Billy experienced extreme neglect in their early lives including being exposed to violence and drug use in their birth mother's life.

At 4 and 3 years old Katie and Zoe developed a close relationship and they play well together. As their brother Billy, age 2 has grown the children have started to bond and grow together as siblings

Katie

Katie is 4 years old and an outgoing little girl who enjoys the outdoors and crafting activities. She plays well with other children and adults. She has settled well at nursery and her ability to learn and try new

things has developed since being in foster care.

Katie is a happy, healthy girl for her age, who thrives on routine. She eats and sleeps very well. There is some concern that she can

sometimes be over familiar with those she does not know, but with good boundaries from her foster carers this is improving and she will need ongoing support to manage this

Zoe

Zoe is a happy and healthy 3 year old girl. She is meeting all her milestones for her age and there are no concerns about her physical development at this stage, although like her siblings, emotionally she

operates at a younger level. Zoe is a caring little girl with a lovely sweet smile who loves a cuddle. She has settled at nursery and enjoys colouring and imagination play with her toys. Zoe can be shy and often

lacks confidence in strange situations – she can require a bit of support to try new things

Billy

Billy at 2 years old, is the youngest of the 3 siblings. He has a cheeky laugh, beaming smile and is described as "a loveable little soul". Since being in foster carer, Billy

has learnt to trust adults around him, and relax and play – he is now demonstrating a definite personality with quite the sense of humour!. Billy was born

prematurely and is still catching up on his development, but has shown a quiet determination and enjoys all the opportunities he is offered.

Do you have the energy for this thriving trio?

Katie, Zoe & Billy are described by their foster carers as a 'joy to care for'; their carers feel that the

children need to find a new family soon who can support their blooming relationships as a sibling

group, nurture and support them as they grow..
